

AMP for Endpoints

Cisco® Advanced Malware Protection (AMP) for Endpoints integrates prevention, detection, and response capabilities in a single solution, leveraging the power of cloud-based analytics. AMP for Endpoints will protect your Windows, Mac, Linux, Android, and iOS devices through a public or private cloud deployment.

Benefits of Cisco AMP for Endpoints

Stop attacks and simplify security operations. Cisco AMP for Endpoints offers cloud-delivered next-generation antivirus, endpoint protection platform (EPP), and advanced endpoint detection and response (EDR). It's the endpoint security you need.

Block attacks before they target you

Powered by **Cisco Talos**, we block more threats than any other security provider. See a threat once and block it everywhere.

Know everything about every endpoint

Simplify security investigations with advanced EDR and a broader context on endpoint, web, email, and network data.

Respond confidently (1:38)

Automate threat responses with one-click isolation of an infected host. Get broader control beyond just the endpoint.

Additional AMP Everywhere Integrations

Make sure you are fully protected by AMP across all components of your network with these additional integrations.

Secure Internet gateways

Web Security

Meraki MX UTM platform

ISR branch router

Breach prevention. Continuous monitoring of malicious behavior. Rapid malware detection. Malware removal.
