

## Cisco Umbrella

**Cisco Umbrella** is a cloud-native platform that delivers the most secure, reliable, and fastest internet experience to more than 100 million users daily. Umbrella unifies firewall, secure web gateway, DNS-layer security, cloud access security broker (CASB), and threat intelligence solutions into a single platform to help businesses of all sizes secure their network. As more organizations embrace direct internet access, Umbrella makes it easy to extend protection to roaming users and branch offices.

### Top 10 reasons to point your DNS to Cisco Umbrella:

1. Better visibility to see internet activity
2. Unmatched threat intelligence to block malware
3. Highly scalable, automated defenses to keep your data safe
4. Hardened DNS resolver code reduces risk of exploits
5. The first service to encrypt DNS traffic to secure the “Last Mile”
6. Support for DNSSEC
7. Transparent operational excellence
8. Unbeatable performance and reliability with Anycast routing
9. Over 900 peers at internet exchange points
10. Smarter DNS cache technology

**Because Umbrella is delivered from the cloud, it is the easiest way to protect all of your users in minutes.**
